In the Specification:

On page 1, and elsewhere as required, delete the title, and replace with

Enriched Population of Neural Precursor Cells

After page 52 of the specification, add page 53 with the following abstract.

ABSTRACT

Enriched Population of Neural Precursor Cells

An enriched population of mammalian dorsal neural progenitor cells, e.g., dopameric neural precursors cells, are described that are useful to induce neural regeneration in mammals suffering from a neurodegenerative disease.
